

The logo for the Underwater Technology Conference (UTC) is a blue shield-shaped banner with a pointed bottom. It is centered on a dark blue background with a subtle, glowing particle effect. The text 'UTC' is written in large, bold, white capital letters at the top of the banner. Below it, the words 'Underwater', 'Technology', and 'Conference' are stacked in a smaller, white, sans-serif font.

Subsea- Enabling Smarter Solutions

About UTC

UTC is a widely recognized conference, which attracts participants from all parts of the international subsea community. We expect more than 500 delegates and 30 exhibitors attending the event, 16 – 17th of June 2021.

The delegates and presenters at UTC are executives, managers, engineers and other strategic and planning personnel related to subsea technology.

2021 will be different, as the world is different. We will adapt the conference to an online event, allowing everyone to participate from their own home-office. UTC recognizes the importance of the technology updates and networking opportunities that UTC offers, and we work towards finding good solutions in a challenging time.

The UTC host organization, the Underwater Technology Foundation (UTF), is a non-profit foundation aspiring to increase the level of competence within underwater technology and related disciplines. Profits are aimed at being returned to the subsea industry in form of grants for education and funding of research projects.

The delegates attending the conference are a success factor for UTC. A relevant and applicable technical program, as well as arenas for networking and discussions, have a high focus when planning for the event. The Program Committee consists of Norwegian and International professionals, from both operators and suppliers, ensuring a conference program of high standards. Delegates are invited to a related seminar on Market and Investors relations, and networking events.

We hereby invite your company to participate as a sponsor to profile your company and make UTC an even greater subsea event!

Please contact sindre@utc.no for more information and booking.

About UTC 2021

UTC - proud enabler for a low-carbon future

Today's energy industry is one of the most interesting and important places to be as an engineer or technology developer. Underwater Technology Conference is held for the 27th time to drive and promote technology innovation within the subsea space. In the energy transition we believe technology development is key.

UTC2021 is an important meeting hub for all underwater technology users and developers to collaborate and create the change.

The UTC 2021 Exhibition is digital

The exhibition will be digital this year. We feel confident that this solution will be very beneficial to both the participants and the exhibitors. You will be able to do one to one meetings via webcam, upload images, videos and brochures. The exhibition area will be open all day so participants can mingle in the area during breaks or stop by any time of the day.

There will also be exhibition events in the program to promote the exhibition.

Stand: NOK 15 500

Conference fee per delegates: NOK 3 000

All prices ex. VAT

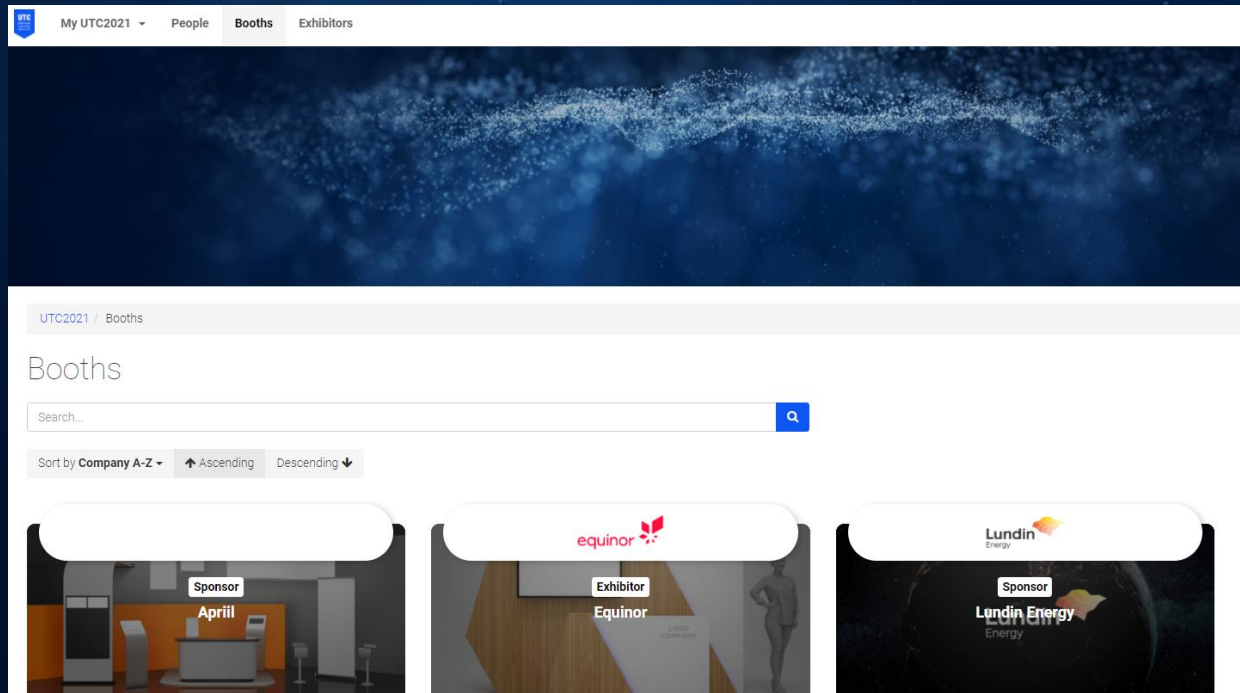

Exhibitor features:

- virtual stand
- 1 to 1 video meetings with delegates on your stand
- delegate list
- publish videos, images and text about your technology or services
- create visibility for your brand through logo placement
- stand chat for your stand and its visitors
- lead retrieval

Please contact April to make stand reservations:
